Paul - Whenever I get an affidavit off / if I don't have another one waiting I try to reduce the accumulation a bit. Today I found FBI copies of Secret Service copies of FBI records released to Harvey Levy - copied for you when I received the stuff last October! I have no idea what it is. Almost bedtime. Nor any idea why I copied some, although it could have included the interests of others, like Cole. Anyway, they'll go Sol mail when possible. ...A little bit of I hope more than temporarily encouraging news about additional expeditious release files daytime when she's free. Today she made a good start. I'm integrating the two releases, by file, beginning with 62-109060. When she is finished they'll be in sequential order and all those not already in individual and clearly identified file folders will be. I plan to do 105-82555 next, then 62-109090 and then the bulkys, of which I have maybe 40,000 pages. Then FOs. When she has this in order I'll get to my overflow files, regular office files for which no room and inactives moved to basement, after which I'll make more space in office files. Plenty of work if she does not get a better job. I've had a few speaking engagements but not of which I'm using this way. One more scheduled so I think there will be enough to get this mess cleared up. ...Dear Mindlo is doing some sorties in Chronicle. ...On other things, esp. HSCA, you probably know more than I do. All I've heard lately is that they'll have no pix in report and that the Ray stuff has been printed.
